EXPERIENCE

AI Film Content Creator

2023-present

FREELANCE / PERSONAL PROJECTS

Creating images and video materials using generative AI tools. Directing style, narrative and mood in commercial and personal projects.

Video Creator & AI Art Director

2021-2025

THE KNIGHTS OF UNITY

Directing and producing trailers for the studio's own games and published titles. Leading 2D and 3D artists, creative concept, editing, sound design. Creating graphics and video using AI — from prompting to final output. Contributing to the company's visual identity and publishing projects.

Motion Designer & Visual Creator

2019-2021

SURFER

Motion design, UI/UX and advertising material design for a data-driven SEO startup in its early years. Video editing and production.

Motion Graphic Designer

2018-present

VIDSY — WARNER BROS / HBO / NETFLIX / UBISOFT / BLIZZARD & OTHERS

Creating mobile video ads for some of the world's biggest brands. Campaigns for Harry Potter, Game of Thrones, Assassin's Creed, Warcraft, Maybelline, Philips, La Roche-Posay and many more.

Video Creator & Visual Designer

2014-2019

STOWARZYSZENIE NOWE HORYZONTY

Co-creating visual identities for the New Horizons IFF and the American Film Festival. Graphic and video production, social media, interactive projects (AR, chatbot).

Cover letter

MATEUSZ RYCHLIK — AI FILM CREATOR

Dear Hiring Team,

I am applying for the position of AI Artist / AI Film Content Creator. The space where cinematic imagery, generative tools and visual storytelling meet is the natural direction of my development — and exactly what I do every day.

I have a cinematic and photographic sensibility for the image. I studied at the Cinematography Department of Film School, developing a conscious approach to colour, light and composition. I have watched thousands of film frames, exploring the relationship between meaning, aesthetics and emotion — today I bring that same sensibility to working with AI-generated imagery.

On a daily basis I work with generative tools for image and video creation. I create and edit video materials, prepare visual sets for campaigns, social media and presentations — combining a design-driven approach with cinematic thinking.

Over the years I produced video materials for the New Horizons Association, the New Horizons International Film Festival, the American Film Festival and the New Horizons Cinema, co-creating their visual language and aesthetic DNA.

In parallel, I worked on advertising projects and visual communication for global brands: Warner Bros, HBO, Netflix, Ubisoft, Blizzard, Nokia, Duolingo, HP, Philips, VARTA, Maybelline New York and La Roche-Posay — contributing to campaigns for Harry Potter, Game of Thrones and Assassin's Creed, among others.

I gained my experience at the intersection of culture, technology and the gaming industry. This taught me to work in a fast-changing environment and to consciously choose tools to achieve the intended effect. I understand AI not as a shortcut, but as a process of directing image, style and narrative.

I am enclosing my portfolio and video work samples. I would be happy to talk about my creative process in more detail.

Kind regards,

Mateusz Rychlik
